(See more information on the other side)

ELEVATE YOUR WEIGHT MANAGEMENT, ENERGY AND PERFORMANCE EVERY SINGLE DAY!

KETOLEAN[™] WEIGHT MANAGEMENT (Available in 2-Packs & 60-Count Canisters)

TruRise KetoLean[™] is a breakthrough product that helps you manage your weight by utilizing MCTs, Irvingia Gabonensis, Acetyl-L-Carnitine, L-Tyrosine, Caffeine Anhydrous and TeaCrine[™] Nootropic Technology. TruRise KetoLean[™] is formulated with highly effective ingredients that target multiple metabolic pathways in the body associated with satiety, metabolic wellness, fat burning, blood sugar balance, cardiovascular health, optimal performance, more energy and enhanced cognitive capabilities.

This product is for anyone interested in managing their weight, increasing energy and improving their overall well-being. TruRise KetoLean[™] enhances ketone production and helps people feel more alert, focused and energetic without performance plateaus, and keeps you in control with a smooth lift and no crash. Busy professionals, on-the-go moms and dads, gamers, or even college students looking to get more out of their day will benefit from this product.[†]

Try it now to RISE TO YOUR TRU POTENTIAL.

- ↑
WEIGHT MANAGEMENT[†]

TEACRINE®

ACETYL-L-CARNITINE

L-TYROSINE

IRVINGIA GABONENSIS

MCT OIL POWDER

TEACRINE®

TeaCrine® is a patent-pending compound containing pure theacrine, which can be found in natural sources such as the *Camellia assamica var. kucha* tealeaf, coffee and certain exotic fruits. A nature-identical compound, TeaCrine® delivers energy, mental clarity, and improved motivation and mood. TeaCrine® has a multi-pronged effect that is ideal for demanding athletes, driven professionals, gamers and anyone striving to attain peak performance. Based on preclinical and human clinical research, TeaCrine® facilitates a wide range of health functions including boosting mental and physical energy without jitters, irritability or habituation while supporting a positive mood and concentration.†

Acetyl-L-Carnitine:

Acetyl-L-Carnitine (ALC) is absorbed by the body better than regular L-carnitine. The Acetyl group also allows it to be taken up to the brain, which can promote better brain function and mood, as well as enhance energy levels. The most critical role that carnitine plays in the body is helping transport fats across the mitochondria of the cells. The mitochondria are essentially the power plants of the cells, where the majority of adenosine triphosphate (ATP) is derived for energy. Once fatty acids pass into the mitochondria, they can be oxidized ("burned") to generate ATP. Without adequate carnitine, most dietary fat cannot get into the mitochondria to be burned for fuel. Several research studies support the notion that supplementing with carnitine enhances fat burning, not just during exercise, but also at rest.†

L-Tyrosine:

This amino acid has a test track record for supporting alertness, mental focus, mood and energy, especially when combined with caffeine. The body uses tyrosine to produce several important hormones and neurotransmitters such as dopamine, epinephrine (adrenaline), norepinephrine, and thyroid hormones. Increased levels of these hormones and neurotransmitters ramps you up, making you more alert and focused.†

African Mango (Irvingia Gabonensis):

Irvingia Gabonensis is a highly effective ingredient that targets multiple metabolic pathways in the body associated with satiety and appetite control, metabolism, fat burning, and blood sugar balance.

In one Clinical study, Irvingia Gabonensis was administered at 150 mg twice daily before meals for 10 weeks to overweight and/or obese human volunteers. The study yielded significant improvements in body weight, body fat, and waist circumference as well as plasma total cholesterol, LDL cholesterol, blood glucose, C-reactive protein, adiponectin and leptin levels that were observed. There are many other studies showing similar findings.†

Caffeine Anhydrous:

Caffeine Anhydrous provides you with a long-lasting, extreme energy boost coupled with enhanced focus and alertness. Caffeine will also provide increased fat oxidation leading to a revved-up metabolism and fatty tissue stimulation.†

MCT Oil Powder:

Medium-Chain Triglycerides (MCTs) have a smaller molecular structure and are more soluble in water. Therefore, it is easier for your body to absorb and does not require a complicated digestive process. Whereas conventional fats are prone to being stored as body fat, MCTs are transported directly from the small intestine to the liver by the portal vein. In the liver, some of the MCTs are turned into ketone bodies, which the muscles can use for energy. Some MCTs are used for thermogenesis, and a portion is converted to ATP. MCTs are therefore processed in the liver, so there is little left to be stored as fat.

MCTs are fats with fatty acids of 8-10 carbons, which can be found in sources like coconut oil, palm kernel oil, and milk - especially goat milk. On the other hand, fatty acids of 12 carbons or greater are absorbed from the intestine into the lymphatic system for transport to adipose tissue for storage.†

Supplement Facts		
Serving Size: 1 capsule	Servings Per Packet: 2	
	Amount Per Serving	% Daily Value*
Caffeine Anhydrous	100mg	**
Proprietary Blend	600mg	**
MCT Oil Powder (Medium Chain Triglyceride Oil)		**
Theacrine (as TeaCrine®)		**
Irvingia Gabonensis (7% albumins)		**
Acetyl L-Carnitine		**
Avocado Fruit Powder		**

*Daily Value based on 2000 calorie diet
**Daily value not established

Other ingredients: Gelatin (Capsule), Magnesium stearate, FD&C Blue #1 (Capsule Color), Titanium Dioxide (Capsule Color)

DIRECTIONS: As a Dietary Supplement, adults take one capsule in the morning and one capsule in the early afternoon, 20 minutes to 1 hour before eating a meal. Do not take at bedtime as the product may cause restlessness.

KEEP OUT OF REACH OF CHILDREN. Protect from heat, light and moisture. Store at 15-30°C (59-86°F). Do not purchase if seal is broken or missing.
